Re: Adams Telcom, Inc.  
Carrier Reports on Implementation of Wireless E911 Phase II  
Automatic Location Identification - CC Docket No. 94-102

Dear Ms. Salas:

Adams Telcom, Inc. ("Adams") hereby files its report on implementation of Wireless E911 Phase II Automatic Location Identification ("ALI") (CC Docket No. 94-102) pursuant to Section 20.18(i) of the Commission's Rules.<sup>1</sup>

Adams has not begun offering wireless service. The company plans to initiate service in accordance with the Commission's construction requirements associated with its license. Accordingly, this report does not reference any schedules for installation of the hardware and/or software and does not contain a TRS number. To date, Adams has not received a Phase II request from a PSAP that is capable of receiving and utilizing the data elements and has a mechanism in place for recovering the PSAP's costs.

At this time, Adams has not determined which vendor to use for provision of wireless service. As it investigates and negotiates with various vendors as to its network infrastructure, it will consider whether to utilize a network-based, handset-based or hybrid ALI technology. Adams is hopeful that during this period of investigation and research, one or more network-based or hybrid vendors will be identified that will have integrated the necessary technology to provide both E-911 Phase I and Phase II technologies into their products. If such a vendor does not emerge, Adams anticipates that it will utilize a handset approach.
